AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application:

- (Currently Amended) An albumin fusion protein comprising a member selected from the group consisting of:
- (a) a Therapeutic protein:X protein X and albumin comprising the amino acid sequence of SEQ ID NO:18;
- (b) a Therapeutic protein:X protein X and a fragment or a variant of the amino acid sequence of SEQ ID NO:18, wherein said fragment or variant has albumin activity;
- (c) a Therapeutic protein:X protein X and a fragment or a variant of the amino acid sequence of SEQ ID NO:18, wherein said fragment or variant has albumin activity, and further wherein said albumin activity is the ability to prolong the shelf life of the Therapeutic protein:X protein X compared to the shelf-life of the Therapeutic protein:X protein X in an unfused state;
- (d) a Therapeutic protein:X protein X and a fragment or a variant of the amino acid sequence of SEQ ID NO:18, wherein said fragment or variant has albumin activity, and further wherein the fragment or variant comprises the amino acid sequence of amino acids 1-387 of SEQ ID NO:18;
- (e) a fragment or variant of a Therapeutic protein:X protein X and albumin comprising the amino acid sequence of SEQ ID NO:18, wherein said fragment or variant has a biological activity of the Therapeutic protein:X protein X;

FINNEGAN HENDERSON FARABOW GARRETT & DUNNER LLP

- (f) a Therapeutic protein:X protein X, or fragment or variant thereof, and albumin, or fragment or variant thereof, of (a) to (e), wherein the Therapeutic protein:X protein X, or fragment or variant thereof, is fused to the N-terminus of albumin, or the N-terminus of the fragment or variant of albumin;
- (g) a Therapeutic protein:X protein X, or fragment or variant thereof, and albumin, or fragment or variant thereof, of (a) to (e), wherein the Therapeutic protein:X protein X, or fragment or variant thereof, is fused to the C-terminus of albumin, or the C-terminus of the fragment or variant of albumin;
- (h) a Therapeutic protein:X protein X, or fragment or variant thereof, and albumin, or fragment or variant thereof, of (a) to (e), wherein the Therapeutic protein:X protein X, or fragment or variant thereof, is fused to the N- terminus and C-terminus of albumin, or the N-terminus and the C-terminus of the fragment or variant of albumin;
- (i) a Therapeutic protein:X protein X, or fragment or variant thereof, and albumin, or fragment or variant thereof, of (a) to (e), which comprises a first Therapeutic protein:X protein X, or fragment or variant thereof, and a second Therapeutic protein:X protein X, or fragment or variant thereof, wherein said first Therapeutic protein:X protein X, or fragment or variant thereof, is different from said second Therapeutic protein:X protein X, or fragment or variant thereof;
- (j) a Therapeutic protein:X protein X, or fragment or variant thereof, and albumin, or fragment or variant thereof, of (a) to (i), wherein the Therapeutic protein:X protein X, or fragment or variant thereof, is separated from the albumin or the fragment or variant of albumin by a linker; and

FINNEGAN HENDERSON FARABOW GARRETT & DUNNERLL

(k) a Therapeutic protein:X protein X, or fragment or variant thereof, and albumin, or fragment or variant thereof, of (a) to (j), wherein the albumin fusion protein has the following formula:

R1-L-R2; R2-L-R1; or R1-L-R2-L-R1,

and further wherein R1 is Therapeutic protein:X protein X, or fragment or variant thereof, L is a peptide linker, and R2 is albumin comprising the amino acid sequence of SEQ ID NO:18 or a fragment or variant of albumin.

wherein the Therapeutic protein X is selected from at least one of the proteins set forth in Table 1.

- 2. (Currently Amended) The albumin fusion protein of claim 1, wherein the shelf-life of the albumin fusion protein is greater than the shelf-life of the Therapeutic protein:X protein X, or fragment or variant thereof, in an unfused state.
- 3. (Currently Amended) The albumin fusion protein of claim 1, wherein the in vitro biological activity of the Therapeutic protein:X protein X, or fragment or variant thereof, fused to albumin, or fragment or variant thereof, is greater than the in vitro biological activity of the Therapeutic protein:X protein X, or fragment or variant thereof, in an unfused state.
- 4. (Currently Amended) The albumin fusion protein of claim 1, wherein the in vivo biological activity of the Therapeutic protein:X protein X, or fragment or variant thereof, fused to albumin, or fragment or variant thereof, is greater than the in vivo biological activity of the Therapeutic protein:X protein X, or fragment or variant thereof, in an unfused state.

FINNEGAN HENDERSON FARABOW GARRETT & DUNNER LLP

5. (Currently Amended) An albumin fusion protein comprising a Therapeutic protein:X protein X, or fragment or variant thereof, inserted into an albumin, or fragment or variant thereof, comprising the amino acid sequence of SEQ ID NO:18 or fragment or variant thereof, wherein the Therapeutic protein X is selected from at least one of the proteins set forth in Table 1.

6. (Currently Amended) An albumin fusion protein comprising a Therapeutic protein:X protein X, or fragment or variant thereof, inserted into an albumin, or fragment or variant thereof, comprising an amino acid sequence selected from the group consisting of:

- (a) amino acids 54 to 61 of SEQ ID NO:18;
- (b) amino acids 76 to 89 of SEQ ID NO:18;
- (c) amino acids 92 to 100 of SEQ ID NO:18;
- (d) amino acids 170 to 176 of SEQ ID NO:18;
- (e) amino acids 247 to 252 of SEQ ID NO:18;
- (f) amino acids 266 to 277 of SEQ ID NO:18;
- (g) amino acids 280 to 288 of SEQ ID NO:18;
- (h) amino acids 362 to 368 of SEQ ID NO:18;
- (i) amino acids 439 to 447 of SEQ ID NO:18;
- (j) amino acids 462 to 475 of SEQ ID NO:18;
- (k) amino acids 478 to 486 of SEQ ID NO:18; and
- (I) amino acids 560 to 566 of SEQ ID NO:18;

wherein the Therapeutic protein X is selected from at least one of the proteins set forth in Table 1.

FINNEGAN HENDERSON FARABOW GARRETT & DUNNERLLP

7. (Currently Amended) The albumin fusion protein of claim 5, wherein said albumin fusion protein comprises a portion of albumin sufficient to prolong the shelf-life of the Therapeutic protein:X protein X, or fragment or variant thereof, as compared to the shelf-life of the Therapeutic protein:X protein X, or fragment or variant thereof, in an unfused state.

- 8. (Currently Amended) The albumin fusion protein of claim 6, wherein said albumin fusion protein comprises a portion of albumin sufficient to prolong the shelf-life of the Therapeutic protein:X protein X, or fragment or variant thereof, as compared to the shelf-life of the Therapeutic protein:X protein X, or fragment or variant thereof, in an unfused state.
- 9. (Currently Amended) The albumin fusion protein of claim 5, wherein said albumin fusion protein comprises a portion of albumin sufficient to prolong the in vitro biological activity of the Therapeutic protein:X protein X, or fragment or variant thereof, fused to albumin as compared to the in vitro biological activity of the Therapeutic protein:X protein X, or fragment or variant thereof, in an unfused state.
- 10. (Currently Amended) The albumin fusion protein of claim 6, wherein said albumin fusion protein comprises a portion of albumin sufficient to prolong the in vitro biological activity of the Therapeutic protein:X protein X, or fragment or variant thereof, fused to albumin as compared to the in vitro biological activity of the Therapeutic protein:X protein X, or fragment or variant thereof, in an unfused state.
- 11. (Currently Amended) The albumin fusion protein of claim 5 wherein said albumin fusion protein comprises a portion of albumin sufficient to prolong the in vivo biological activity of the Therapeutic protein:X protein X, or fragment or variant thereof,

FINNEGAN HENDERSON FARABOW GARRETT & DUNNER LLP

fused to albumin compared to the in vivo biological activity of the Therapeutic protein:X protein X, or fragment or variant thereof, in an unfused state.

- 12. (Currently Amended) The albumin fusion protein of claim 6 wherein said albumin fusion protein comprises a portion of albumin sufficient to prolong the in vivo biological activity of the Therapeutic protein:X protein X, or fragment or variant thereof, fused to albumin compared to the in vivo biological activity of the Therapeutic protein:X protein X, or fragment or variant thereof, in an unfused state.
- 13. (Original) The albumin fusion protein of any one of claims 1-12, which is non-glycosylated.
- 14. (Original) The albumin fusion protein of any one of claims 1-12, which is expressed in yeast.
- 15. (Original) The albumin fusion protein of claim 14, wherein the yeast is glycosylation deficient.
- 16. (Original) The albumin fusion protein of claim 14 wherein the yeast is glycosylation and protease deficient.
- 17. (Original) The albumin fusion protein of any one of claims 1-12, which is expressed by a mammalian cell.
- 18. (Original) The albumin fusion protein of any one of claims 1-12, wherein the albumin fusion protein is expressed by a mammalian cell in culture.
- 19. (Original) The albumin fusion protein of any one of claims 1-12, wherein the albumin fusion protein further comprises a secretion leader sequence.
- 20. (Original) A composition comprising the albumin fusion protein of any one of claims 1-12 and a pharmaceutically acceptable carrier.

FINNEGAN HENDERSON FARABOW GARRETT & DUNNER LLP

- 21. (Original) A kit comprising the composition of claim 20.
- 22. (Withdrawn) A method of treating a disease or disorder in a patient, comprising the step of administering the albumin fusion protein of any one of claims 1-12.
- 23. (Withdrawn) The method of claim 22, wherein the disease or disorder comprises indication:Y.
- 24. (Withdrawn) A method of treating a patient with a disease or disorder that is modulated by Therapeutic protein:X, or fragment or variant thereof, comprising the step of administering an effective amount of the albumin fusion protein of any one of claims 1-12.
- 25. (Withdrawn) The method of claim 24, wherein the disease or disorder is indication:Y.
- 26. (Withdrawn) A method of extending the shelf life of Therapeutic protein:X, or fragment or variant thereof, comprising the step of fusing the Therapeutic protein:X, or fragment or variant thereof, to albumin, or fragment or variant thereof, sufficient to extend the shelf-life of the Therapeutic protein:X, or fragment or variant thereof, compared to the shelf-life of the Therapeutic protein:X, or fragment or variant thereof, in an unfused state.
- 27. (Withdrawn) A nucleic acid molecule comprising a polynucleotide sequence encoding the albumin fusion protein of any one of claims 1-12.
 - 28. (Withdrawn) A vector comprising the nucleic acid molecule of claim 27.
 - 29. (Withdrawn) A host cell comprising the nucleic acid molecule of claim 28.
